Education

JANUARY 2024 - JANUARY 2028 (EXPECTED)
UNIVERSITY OF SINDH , JAMSHORO – *software engineering*

Software Engineering is a dynamic field that applies engineering principles to design, develop, and maintain software systems. At Sindh University's Software Engineering department, students learn the fundamentals of software development, including programming languages, data structures, and software design patterns.

SUMMARY

As a freelancer with a background in Software Engineering from Sindh University, I've developed a strong foundation in designing and developing software systems. In addition to my technical skills, I've also honed my abilities in data entry, allowing me to provide high-quality services to clients. With expertise in data management and software development, I offer a unique combination of skills that enable me to deliver efficient and effective solutions.
